Security Assessment Service

A security assessment is an exercise that tests your organization's security posture by identifying potential risks, evaluating the existing controls, and suggesting new controls.
Benefits for Business

Avoid Negative Impact to the End Customer

Ensure that customers personal data is secured. After data loss customers may receive not only negative emotions but suffer financial loss as well.

Avoid Negative Impact to Company's Reputation and Brand

Save customer's trust, ensure that company's reputation and brand image will be secured. Recovery after security breach demands a lot of time and finances.

Avoid Financial Impact After GDPR Breach

Costs after GDPR breach can include compensating affected customers, legal fees, and penalties. Penalties may be up to €10–€20 million or 2%-4% of the firm's worldwide annual revenue from the preceding financial year.
